

The beautiful geometry line of the ellipse is interpreted with horizontal and vertical intersections. The use of the square pipes gives this design an additional statement and invites you to have fun.

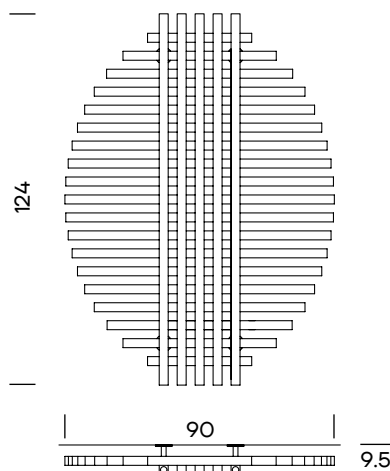

The origin of the design came from the Front Collection, designed out of the collector's pipes which are functionality necessities and visual obstacles most of the time. Hiding something which can not be hidden guided to a solution when exactly these objects became the essence of the whole design by simply moving them in front. This is a story about the moments in life when you need to stand out, even when you think everything is lost. A story about the everyday heroes who motivate us with their acts.
